

**DESIGNSCAPES**

## What is design enabled innovation?

Any kind of innovation enabled by the action of design skills and approaches and aimed at producing new functions, uses and meanings while empowering values.

## Designscapes: Design Enabled Innovation in Urban Environments

Designscapes is an H2020 project with the ambition to exploit the generative potential of urban environments in the highest possible number of European Cities to encourage the adoption of Design Enabled Innovation by existing enterprises, start-up companies, public authorities and agencies, and other urban stakeholders.

*"The intuition behind this project is to put together design, innovation and the city: three things that are mutually reinforcing each other, with the latter enhancing the interplay between the other two."*

*Simone Gheri,  
Director of ANCI Toscana*

# Open Call for Pilot Proposals

Designscapes launches an Open Call with the aim of identifying and financially supporting at least 100 European Pilots until 2020.

## Targeted proposals:

Feasibility Studies, Prototypes and Scalability Proofs of Design Enabled Innovation in urban environments

## 3 Categories, 3 Deadlines:

Targeted proposals	Opening Date	Deadline
Feasibility Studies	13.07.2018	30.11.2018
Prototypes	01.12.2018	31.05.2019
Scalability Proofs	01.06.2019	29.11.2019

## Who can apply

Any legal entity, including natural persons aged 16+ (only for Feasibility Studies)

## Funding

1.5M Euro
